List of Figures

This document ... Section 11 Code Coverage Metrics is removed.

3 Functional Requirements Evaluation

4 Nonfunctional Requirements Evaluation

In the section

4.1 Usability

The table below shows the results of our usability tests based on the tests in the V&V plan based on the requirements mentioned in the SRS. Each requirement can be traced to multiple unit tests and the usability survey used can be found in the Appendix.

Usability Tests				
Requirement	Related Unit Tests	Description	Expected Result	Result
NF-UT1	AF	Completing tasks without additional assistance.	User will be complete tasks successfully	PASS
NF-UT2	AX	Interact with interace to modify parameters.	User will be able to modify the parameters accurately and quickly.	PASS
NF-UT3	AL	Completing all tasks with limited number of mistakes	User will be able to complete all tasks with <i>MAX_MISTAKE</i>	PASS
NF-UT3	AL	Verifying if interacting with the application previously improves ease of use (learnability)	User will be able to complete the tasks more quickly and accurately the second time	PASS
NF-UT5	AS	Verifying how calculations are performed is hidden	User will not know how calculations are performed after doing the set of tasks	PASS
NF-UT6	AS	Verifying appropriate application size upon installation	User will install application onto computer and verify that the application size is less than or equal to <i>MAX_SIZE</i>	PASS

4.2 Performance

4.3 etc.

5 Comparison to Existing Implementation

This section will not be appropriate for every project.

6 Unit Testing

7 Changes Due to Testing

8 Automated Testing

9 Trace to Requirements

10 Trace to Modules
