This document ... Section 11 Code Coverage Metrics is removed.

- 3 Functional Requirements Evaluation
- 4 Nonfunctional Requirements Evaluation

In the section

4.1 Usability

The table below shows the results of our usability tests based on the tests in the V&V plan based on the requirements mentioned in the SRS. Each requirement can be traced to multiple unit tests and the usability survey used can be found in the Appendix.

Usability Tests				
Test Requirement	Related Unit Tests	Description	Expected Result	Result
NF-UT1	AF	Completing tasks without additional assistance.	User will be complete tasks successfully	PASS
NF-UT2	AX	Interact with interace to modify parameters.	User will be able to modify the parameters accurately and quickly.	PASS
NF-UT3	AL	Completing all tasks with limited number of mistakes	User will be able to complete all tasks with MAX_MISTAKE	PASS
NF-UT3	AL	Verifying if interacting with the application previously improves ease of use (learnability)	User will be able to complete the tasks more quickly and accurately the second time	PASS
NF-UT5	AS	Verifying how calculations are performed is hidden	User will not know how calculations are performed after doing the set of tasks	PASS
NF-UT6	AS	Verifying appropriate application size upon installation	User will install application onto computer and verify that the application size is less than or equal to MAX_SIZE	PASS

4.2 Performance

4.3 etc.

5 Comparison to Existing Implementation

This section will not be appropriate for every project.

6 Unit Testing

6.1 Calculation Module

Unit Tests for Calculation Module					
Unit Test ID	Description	Input	Expected Output	Output	Result
UT-C1	Testing the getResistance Method	From Hard-wareInput ADT: Voltage = 5, Current = 1	5.000	5.000	PASS
UT-C1	Testing the getResistance Method	From Hard-wareInput ADT: Voltage = 4, Current = 0.6	6.667	6.667	PASS
UT-C2	Testing the getResistance Method	From Hard-wareInput ADT: Voltage = -5, Current = 1	Invalid	Invalid	PASS
UT-C2	Testing the getResistance Method	From Hard- wareInput ADT: Voltage = -4, Current = 0.6	Invalid	Invalid	PASS
UT-C1	Testing the getResistivity Method	Resistance $= 3$,	5.000	5.000	PASS

7 Changes Due to Testing

8 Automated Testing

9 Trace to Requirements

Traceability Matrix to Non Functional Requirements					
Requirement	Requirement(SRS)	Test Requirement	Related Unit Tests		
Type					
Non Functional	NFR-U1	NF-UT1	U		
Non Functional	NFR-U2	NF-UT2	U		
Non Functional	NFR-U3	NF-UT3	U		
Non Functional	NFR-U4	NF-UT4	U		
Non Functional	NFR-U5	NF-UT5	U		
Non Functional	NFR-U6	NF-UT6	U		

Traceability Matrix to Functional Requirements					
Requirement	Requirement(SRS)	Test Requirement	Related Unit Tests		
Type					
Functional	FR1	FR-T1	U		
Functional	FR2	FR-T2	U		
Functional	FR3	FR-T3	U		
Functional	FR4	FR-T4	U		
Functional	FR5	FR-T5	U		
Functional	FR6	FR-T6	U
